

COMPANY PROFILE

sepago is a company providing consultancy, services, and software development for complex IT infrastructures. sepago specializes on individual solutions and innovative concepts for application provisioning, putting IT on a high performance path ready for the future. As Citrix Platinum and Microsoft Gold Partner, sepago is a leader in the provision of strategic advice and in the implementation of major projects. The company advises customers such as AMB Generali, Barmer, Citrix Systems, Techniker Krankenkasse (health insurance), ITERGO (DKV, Victoria, Hamburg-Mannheimer, DAS), IDG (Gothaer), E.ON IS, Landschaftsverband Rheinland (Rhineland regional association), Veolia Umwelt Services (environmental services), Vodafone D2, and the data center of the state finance administration and the state office for data processing and statistics of North Rhine-Westphalia.

sepago CONSULTING & SERVICES develops strategic concepts for IT management, engineering, and operation, and implements these in cooperation with the customer. Typically, sepago analyzes the existing IT infrastructure first. This provides a basis for developing tailor-made solutions for specific tasks, such as the introduction of new applications or increasing the security and stability of the IT infrastructure. The solutions are optimized with regard to cost efficiency, excellent system performance and sustainability. sepago develops innovative concepts that have been successfully introduced in the largest German IT environments and turns them into standard methods that are useful for other customers, too.

sepago RESEARCH & DEVELOPMENT – sepago experts analyze the practical requirements for application provisioning in large IT projects as part of a continuous innovation process. This body of experience creates new future-oriented ideas and software solutions, which sepago advances in cooperation with technology manufacturers and investors. As a pioneer in the virtualization of user profiles, sepago has contributed an important component to the Citrix product range in the form of the Citrix User Profile Manager. Together with Citrix, sepago continues further development of the Citrix User Profile Manager, advancing the virtualization of user profiles.
